

Learning Activity

Module 6: Vision

As our Emerge journey wraps up, this can be a great time to reflect on the things you have learned and experienced along the way. A great tool to reflect can be Mind Maps! Our team loves Mindomo for doing this digitally ([linked here](#)). If you fancy trying a hand-drawn Mind Map, we also have a handy link to check out for tips ([linked here](#)).

Think about three goals you have (maybe short-term and longer-term). Create a Mind Map for one or all of these goals. A Mind Map is a diagram used to visually organise information. It is a great way to present you with the 'shape' of your goals. You can also capture steps and resources required to achieve your goals and make them manageable whilst being able to visualize them in their entirety.

You can place your goal in the middle and build from there.

And of course, congratulations on all of your hard work throughout the entire Emerge program!
